**American Manufacturing Grows Here**

Cheap energy, available sites with abundant water, Ohio's logistics sweet spot and our skilled workforce mean manufacturing is growing and thriving here.

Our newest resource — the cheapest energy in the Western Hemisphere thanks to the Utica and Marcellus Shale play. The oldest — the Ohio River with its 451 miles of shoreline, 125 plus ports and abundant water for manufacturing. The most enduring — our region's deep history in manufacturing and the rural work ethic of our skilled manufacturing workforce.

Southern and eastern Ohio have a rare mix of assets for locating or growing American manufacturing.
